J. Contributions to knowledge:

As a Plant Scientist, Ethnobotanist and a Senior Lecturer, I, Dr. Abiola Mojisola Asowata-Ayodele, have dedicated my career to advancing knowledge at the intersection of traditional medicinal plant use, phytochemistry and pharmacological research. My work has provided significant ethnobotanical insights, including the documentation of culinary herbs and spices used in South Africa's traditional medicinal systems (Asowata-Ayodele et al., 2016), preserving indigenous knowledge critical for future therapeutic discoveries. I have contributed to the anatomical and micromorphological characterization of medicinal plants such as *Lippia javanica* and *Foeniculum vulgare* (2016, 2019), strengthening botanical identification tools essential for quality control in herbal medicine.

My research into bioactive compounds has established the antioxidant, anti-inflammatory, and antimicrobial potentials of various plant species, such as *Lippia javanica* (2016), pineapple peels, coconut kernel (2017), citrus peels (2019) and *Anchomanes difformis* (2024), demonstrating their promise for novel therapeutic applications. I have further explored the neuroprotective and chemoprotective effects of plant-derived compounds, as shown in my studies on roasted cashew nuts against cisplatin-induced brain toxicity (2022) and the use of *Parquetina nigrescens* in mitigating aluminium chloride-induced cognitive impairment (2024).

As an academic, I have contributed to curriculum development and teaching in plant biology, phytotherapy and pharmacognosy, equipping students with theoretical knowledge and practical skills in medicinal plant research. I have also co-authored book chapters on algae and cyanobacteria as nutritional supplements (2024), and on sulfated polysaccharides with antiulcer and anticarcinogenic potentials (2023), expanding the scientific discourse on natural products in health and nutrition.

Through Asobotanique Herbal Clinic, I translate research into practice by formulating evidence-based herbal remedies and offering holistic consultations that integrate diet, lifestyle and traditional medicine. My entrepreneurial activities complement my scholarly pursuits, promoting safe and sustainable use of African medicinal plants for community health and well-being. Collectively, my contributions bridge traditional knowledge and modern science, fostering innovation in natural therapeutics and phytomedicine.
