F. Professional Accomplishment:

I have made significant contributions to knowledge in the fields of Innovation, project management and healthcare by developing a policy framework for the effective use of project management scheduling tools in the building construction industry, enhancing building management in Nigeria. This is further reflected in the novel framework to enhance the implementation of ICT-based innovations in primary healthcare delivery in Nigeria.

I have also demonstrated expertise in translating academic research into practical solutions, addressing real-world challenges and improving industry practices. Finally, I showcased the

ability to bridge the gap between academia and industry, driving impact and change in key sectors of the Nigerian economy.

J. Contributions To Knowledge

I contributed to knowledge significantly through the development of a policy framework for the effective use of project management scheduling tools in the building construction industry towards enhancing building management in Nigeria. I further developed a new framework to enhance the implementation of ICT-based innovations in primary healthcare delivery in Nigeria. Am currently working on a book of reading that is centered on business innovations to drive technological entrepreneurship for sustainable development in the society and beyond.
